

Writing Empirical Papers for SCOPUS Journals

Series I:
Research Issues – Overview and Introduction

- Expectation
- Elements of Empirical Good Papers
- Discussion: 73 Research topics
- Writing introduction

Key: Research hypothesis is clear or can be developed.

EXPECTATION:

- Writing skill is a long journey and we are taking initial steps – commitment and ready to work hard
- Adhering to deadline
- Persistence in Reading – this is key to many in writing a journal article
- Focus is on writing. However, I would be able to advise if the research falls under my areas of expertise and employs econometric modelling (I do not know everything).
- Start from scratch. You may refer to the content of what you have submitted (e.g. thesis or long writeup) but do not look at the way to have written.

Initial Questions:

- **Are the hypotheses clear and stated explicitly?**
- What are theoretical bases for the hypotheses?
- **Are hypotheses measurable?**
- **Are data available and sufficient?**
- **Do they have practical and/or academic relevance?**
- **Contribution?**

Research objective must be explicitly and clearly stated

Hypothesis: A statement of expectation or prediction to be tested, normally involving relations between variables.

It is normally stated as the research objective

Examples

This research aims to see how the performance of Islamic banking and conventional banking compares during the Covid 19 pandemic

To Analyze the Effect of Sharia Financial Index on Macroeconomics and Poverty

This research aims to provide empirical evidence that various types of bank support have an influence on SME export performance, particularly halal food and Moslem fashion industry.

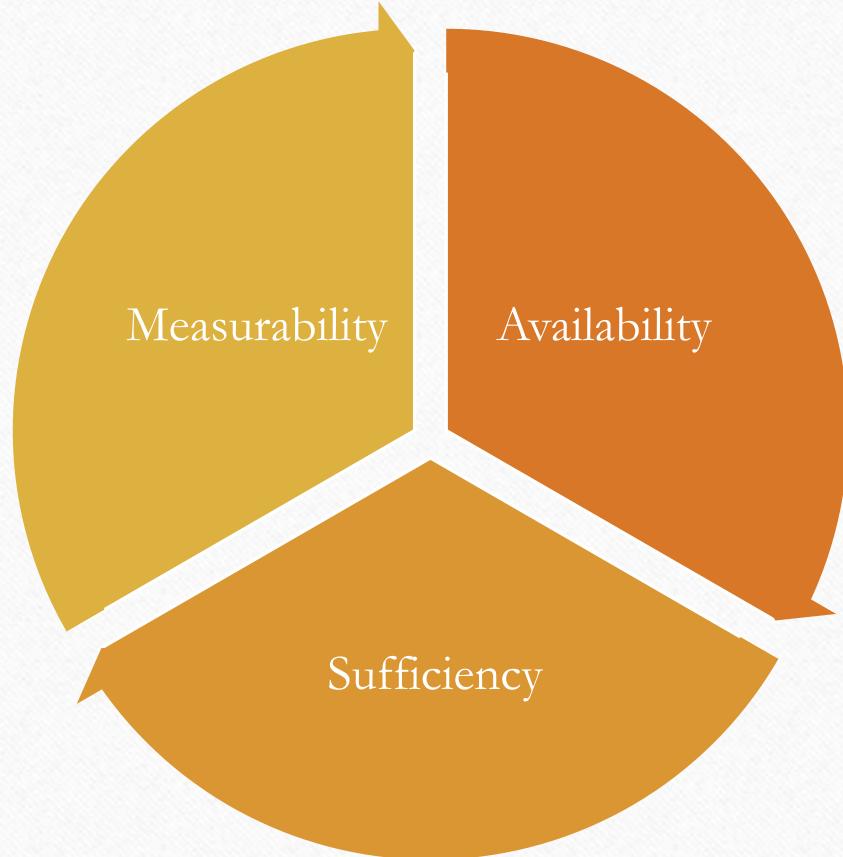

Examples

To investigate the borrowers' characteristics that have an impact on the default risk in Islamic peer to peer lending during covid-19 crisis

Measuring financial performance of Indonesia Islamic Banking during Covid-19 outbreak

Finding factors impact to financial performance of Indonesia Islamic Banking during Covid-19 outbreak
COVID-19 and stock market performance

HYPOTHESES AND DATA

QUESTIONS FOR EMPIRICAL RESEARCH:

- ARE THERE MEASUREMENTS?
- ARE THERE HYPOTHESES TO BE TESTED?
- ARE GENERALIZATION TO BE MADE?

No.	Title (Author)	Hypotheses	Data
01	Determinants of Islamic peer to peer lending default in the covid-19 crisis: Evidence from Indonesia (Dety Nurfadilah)	Characteristics of Loans, Borrowers, Macroeconomy, and institutional investors	Secondary
02	Twin deficits, sukuk and energy sector in Indonesia (Nursechafia)	Macro conditions, sukuk and energy Twin deficits	Secondary
03	Green Sukuk in Mitigating Environmental Risk (Jumansyah)	Green Sukuk Environmental risk	Secondary
04	The Behavior of Indonesian Stock Indices during the COVID-19 Pandemic Crisis: Conventional, Sharia, and SRI in Comparison (Nur Hidayah)	Clear objective. However, Will the scope be sufficient?	Secondary
